

## The process:

Wanting to find yourself is like trying to tune into the radio station of the Higher Self and only getting static.

Finding yourself is when you synchronize the vibrations of the lower self to the Higher Self and you and the radio station become one.

In other words, contact, recognition and relationship is based upon vibratory reaction.

In order to get a clear signal we need to synchronize the brilliance of our light, the rate of our vibration and the tone and clarity of our aura to the Soul or Higher Self.

The process of connection is one of re-orientation and involves purification and refocusing of the personality to the higher rhythm of the soul so that we become a soul-infused personality.

This is a living and dynamic process. When we demonstrate this process by making it a way of life we **change ourselves.**

We literally build the "rainbow bridge" between our soul and it's reflection.  
We become the path.  
WE ARE THE PATH.

*This process doesn't have a name or label or belong to any particular school of thought. The Soul Power workshop simply presents this timeless living process in a contemporary and easy- to- follow framework for your consideration.*

## PART 1: THE POWER OF VISION

In this session we review our lives to  
this point in time, chart our course  
and define our personal culture.

We will revisit this analysis later  
in the workshop.

## PART 2: STANDING IN SPIRITUAL BEING

In this session we learn, using simple and  
practical steps, how to make the shift and  
stand in spiritual being.

We explore, in depth, a 10 step process  
that helps us find ourselves and hold  
the inner connection.

## PART 3: RE-INVENTING YOURSELF

With a deeper soul perspective  
we can move from survival  
to significance.

We revisit our initial vision  
(session one) and super-impose  
our soul's calling with renewed inner  
strength and purpose.

## Here's more about what people have said:

- ◇ I had no idea about the depth of the course. It covers so much. It's more than I imagined it would be. I will revisit it again and again.
- ◇ Content is thorough, significant & meaningful. It's practical. I've now got the tools to make the shift. It offers another way of handling situations.
- ◇ It's not someone telling you what your soul's journey is, but that this is the way to find it. It challenges you to live it. Then you have to tap into it and claim your power.
- ◇ Complex issues have been put so simply. Now I can see what I haven't understood before. Provides a broader perspective.
- ◇ It makes sense. It's like I already know it deep down, like I've got the knowledge within and your drawing it out of me, putting words to something that feels right. That's why I can believe it.
- ◇ It's a dynamic process that will change you when you live it. It's a different way of living life that will make you stronger when you face things in this light.
